Ivan Osipov

About me

Hi my name is Ivan, I enjoy building web and mobile applications. It's an exciting field with lots of opportunities to create solutions that can make a positive impact on people's lives.

The technology landscape is constantly changing and evolving, so it's important to stay up-to-date with the latest tools and techniques. I am trying being curious and open to new ideas, that helps continue to grow and improve my skills as a developer.

Passionate about learning new things, recently got excited about animations and how create them programmatically. Animations can be a powerful tool for creating engaging interfaces and seems like a lot of fun to work with.

Currently

Working as a software engineer with Veri.

Role

Full stack developer with a tilt to client side.

Stack

React

React ReactNative

NodeJS

TypeScript
